

ELIAM PIMENTEL

*Fullstack and Mobile
Developer*

About me

As a full-stack developer, I have experience creating web and mobile applications using technologies such as React, Next.js, Node.js, and NestJS. I have developed complete solutions, from architecture design to business logic implementation, while staying up-to-date with trends like Expo for mobile app development. Passionate about programming, I seek to offer innovative and efficient solutions.

Education

2024 (ongoing)
AWS Certified Cloud Practitioner

2019 - 2024
PUCMM
Computer Systems Engineering

May 2021
React developer
Udemy

Experience

- ◆ Software Developer
Prodominicana
July 2023 - present
Software developer specializing in modern technologies like NestJS for backend and NextJS for frontend, creating scalable and efficient solutions for various projects.
- ◆ Fullstack Developer (Freelance)
Appointment and medical data management
August - December 2022
I designed and developed a software for appointment and medical data management using React for the user interface and NodeJS for the backend API, focusing on a robust architecture and an intuitive user experience.
- ◆ Fullstack Developer (Freelance)
Pharmacy inventory management
September 2021 - April 2022
I developed a pharmacy inventory management system using React, .NET, and a relational database, with automated testing and a focus on scalability and efficiency.

Projects

- ◆ *JC Tough Gear*
January - February 2024
As a full-stack developer, I created a project from start to finish, designing the data architecture and developing both the server and client components. I used Next.js and NestJS for development, Prisma for database management, and designed the interface in Figma. I deployed the client on Netlify and the server on Railway.
- ◆ *JPimentel Consultores*
July - August 2023
As a full-stack developer, I developed a landing page for a financial consultancy using Next.js. I designed the interface in Figma and deployed the site on Netlify.
